Understanding Autism

High-quality learning resources

Autism is a spectrum condition that affects how a person communicates with others and how they interpret the world around them. There are around 700,000 people in the UK with autism – more than 1 in every 100. Having a clear understanding of the misconceptions, diagnoses and support surrounding autism are just some of the essential skills needed when working in mental health.

Benefits to your organisation

Ensure employees understand what is meant by autism and how it is diagnosed

Create a nurturing environment by ensuring employees can support individuals through access to services and employment, and by providing support with transitions and life events.

Create a professional environment by ensuring your team understand the purpose of positive risk taking and how to care using a person-centred approach

Reduce the risk of malpractice and negligence by ensuring your team are aware of the common misconceptions surrounding autism

Create an understanding workforce which is aware of the elements of living with autism and the importance of personal safety

Provide assurances that your employees know how legislation and guidance underpins support for individuals with autism

Ensure team members know how to support positive behaviour and how to help develop coping strategies

Improve your team's understanding of theories relating to autism

Ensure your employees understand how individuals with autism process sensory information and how to recognise and support sensory needs

Improve social strategies by ensuring employees understand speech, language and communication, and how interaction may differ in individuals with autism
